

Construction Management System

Build a construction management system that helps manage construction projects, tasks, and sheets. The application will have the following key features:

- You have to submit the code URL of the public Github Repository/ Google Drive.

Task Details:

- Login/sign up page for both user and admin functionality using JWT (JSON Web Tokens) for authentication.

User's Side:

- Add/Create a new user role for new project details, update and delete details.
- Add the tracking details
- Set up a database to store user data securely.
- Enable and assign tasks related to construction projects.
- Upload constructions sheets or blueprints for dummy purpose
- Allow to save and retrieve the data which is associated with sheets or projects

Examples:

- User- Id, email/phone, password(password visibility, password validations etc)
- Attach PDF formats for the upload
- Add functionalities, tracking details(e.g, task assignments, due dates), authentication.
- User role (e.g., project manager, contractor, supervisor) to control different applications.

NOTE: Need to use both Frontend and Backend Technologies and for storage purposes please use any database.

- Below mentioned images are just for your reference.

DreamHome Realty!

MODERN VILLA

Price : ₹1000000

Location : bbsr

About This Property :

Description: is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.
